CONNECTION VIA WIFI

The system is easy to setup. First of all connect the Heato Box with the APP, then connect Heato Box with the Heato thermostat, then the full system is ready to be controlled.

1. Connecting Heato Box with the APP via WiFi

Download and install the free "My BVF" application from Play Store or AppStore. **Make sure your device is on the same WiFi network as Heato Box** (connect to the same router).

a.   Press **+** at the top right corner in the APP to add a device, then enter your own WiFi password *(see picture 2)*.

b.   Press and hold **SMART**))) **button** on Heato Box for 3 seconds, **LED** starts flashing quickly.

c.   Press **Start** button in the APP. **LED** stops flashing on the Heato Box if the connection is successfull.
APP will auto change to *picture 3*. If not, please refresh the APP page.

d.   Press and hold **BVF Heato Box** icon, then you can modify the Box name.

| 1 | 2 | 3 |

2. Connecting Heato Box with Heato thermostat

As you already connected the Heato Box and APP, now you only need to pair the Heato Box with thermostats by following steps.

a.   Press the **SMART**))) Function Button twice on the Heato Box, then the **LED** starts flashing slowly.

b.   Turn off the Heato room thermostat by pressing ⏻ button, then press and hold the **SMART** button for 5 seconds, then you can see the RF ID in the top right of the screen.
Press the ╪ button on the Heato thermostat. Pairing is done when the RF ID stops flashing.

c.   Refresh the APP, then you will be able to see the first connected device in a list under the BVF Heato Box MultiSmart *(see picture 4)*.

d.   Press and hold **thermostat** icon, then you can modify the device name *(see picture 5)*.

e.   To connect more Heato thermostats (suggested max 8) follow the steps from "a" again.
